DETAILED ACTION

Claim Objections

1. **Claim 7** is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The claimed limitation, in respect to, correcting a signal based the characteristics of the sound wave output units and head of a user and the characteristics between the sound wave output units, is presented in independent claim 1.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. **Claims 1-8** are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, lines 10-13, refers to correct a signal based the characteristis of the sound wave output units and head of a user *and the characteristics between the sound wave output units*. It is unclear why the latter part of the limitation is needed. It is interpreted as though the correction of the characteristic is between the sound wave output units and the head of the user, only. The latter claim language of that limitation makes the claim indefinite.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. **Claims 1-2, 4-5 and 7** are rejected under 35 U.S.C. 102(e) as being anticipated by McGrath, U. S. Patent No.6259795.

Regarding **claim 1**, McGrath discloses a methods and apparatus for processing spatialized audio. McGrath's disclosure comprises a set of headphones which receives and signal and outputs a sound wave of the input signal (audio input signals), which constitutes as a plurality of sound wave output units arranged a head of a user (figure 1 and col. 5, lines 52-55), a B-format creation system, which may be implemented with a digital signal processor (figure 1 and col. 5, lines 65-67 and col. 6, lines 1-12 and col. 16, lines 1-22,) which indicates a 1st signal processing unit for correcting the signal based on the characteristic of the sound wave output unit and the head of the user.

Regarding **claim 2**, McGrath discloses everything claimed as applied above (see claim 1). McGrath further disclose a headphone structure which supports the sound wave output units a the circumference of a user (figure 1- references 3 and 4).

Regarding **claim 4**, McGrath discloses everything claimed as applied above (see claim 1). McGrath further discloses head track means (col. 5, lines 58-64 and figure 1- reference 9), which constitutes as a plurality of detection units.

Regarding **claim 5**, McGrath discloses everything claimed as applied above (see claim 1). McGrath further discloses another processing unit (figure 1 – reference 6), which uses characteristics in which the sound image is fixed in respect to the headphones (col. 6, lines 47-67).

Regarding **claim 7**, the claimed limitations are rejected for the same reasons set forth in the rejection of claim 1.

Allowable Subject Matter

6. **Claims 3, 6 and 8** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
